- X Increase in New Cases
- X Non-Congregate Cases
- X Outpatient Visits
- Emergency Room Visits
- Hospital Admissions
- ICU Bed Occupancy

During the past 14 days, 267 COVID-19 cases have been identified in **Fairfield County**, which means the county exceeds the "high incidence" category as defined by the Centers for Disease Control and Prevention. Approximately 28% of Fairfield County's total cases have been in the past two weeks. Since July 1, Fairfield County's COVID-19 average daily cases increased from 14 cases to 23 cases by July 18, although this indicator did not meet the threshold. Due to clinical and reporting lags, these numbers may continue to grow for this reporting period. Fairfield County is also seeing an increase in the number of people seeking medical care due to COVID-19. From July 1 to July 12, visits for COVID-19 to the emergency department grew from an average of two visit per day to four. Significantly more people are also visiting their doctors and being diagnosed with COVID-19. Between July 1 and July 13, average outpatient visits grew from 16 to 27 visits per day. In recent weeks, more than 90% of the cases are not in congregate settings, signaling significant transmission in the broader community. Outbreaks were linked to out-of-state travel.

New Cases: Past 28 Days

Case data excludes incarcerated individuals.

7-Day Average of New Cases
